Under this right, the land application of water is limited to the reclamation of land directly affected as a result of being mined and is not to exceed a total of 26 acres annually within the place of use described above for mining.

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the Court at a point in time no later than the entry of a final unified decree. Section 42-1412(6), Idaho Code.

EXPLANATORY MATERIAL: BASIS OF CLAIM - License

Water used under this right when discharged into a natural channel or subsurface system shall meet Idaho Water Quality Standards.

After specific notification by the Department, the right holder shall install a suitable measuring device or shall enter into an agreement with the Department to use power records to determine the amount of water diverted and shall annually report the information to the Department.

The issuance of this right in no way grants any right-of-way or easement across the land of another.

A separate stream alteration permit from the IDWR is required for any activity in the stream channel other than construction and/or maintenance of the diversion structure. If the proposed construction or operation involves construction of an outfall or any other work in the stream channel other than a water diversion, the right holder shall contact the Department and obtain a Stream Channel Alteration permit prior to the start of construction.
